Korrekturheft

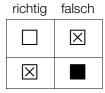

Hinweise zur Korrektur

Bei der Korrektur werden ausschließlich die Antworten auf dem Antwortblatt berücksichtigt.

Korrektur der Aufgaben

Bitte kreuzen Sie bei jeder Frage im Bereich mit dem Hinweis "von der Lehrperson auszufüllen" an, ob die Kandidatin/der Kandidat die Frage richtig oder falsch beantwortet hat.

Falls Sie versehentlich das falsche Kästchen markieren, malen Sie es bitte vollständig aus (■) und kreuzen das richtige an (区).

Gibt eine Kandidatin/ein Kandidat bei einer Frage zwei Antworten an und ist eine davon falsch, so ist die gesamte Antwort als falsch zu werten. Bei der Testmethode *Kurzantworten* zählen alle Wörter, die nicht durchgestrichen sind, zur Antwort.

Bei der Beurteilung werden nur ganze Punkte vergeben. Die Vergabe von halben Punkten ist unzulässig.

Akzeptierte Antworten bei der Testmethode Kurzantworten

Das Ziel der Aufgaben ist es, das Hör- bzw. Leseverständnis der Kandidatinnen und Kandidaten zu überprüfen. Grammatik- und Rechtschreibfehler werden bei der Korrektur nicht berücksichtigt, sofern sie die Kommunikation nicht verhindern. Es sind nur Antworten mit maximal 4 Wörtern zu akzeptieren.

Standardisierte Korrektur

Um die Verlässlichkeit der Testergebnisse österreichweit garantieren zu können, ist eine Standardisierung der Korrektur unerlässlich.

Die Antworten Ihrer Kandidatinnen und Kandidaten sind vielleicht auch dann richtig, wenn sie nicht im Lösungsschlüssel aufscheinen. Falls Ihre Kandidatinnen und Kandidaten Antworten geben, die nicht eindeutig als richtig oder falsch einzuordnen sind, wenden Sie sich bitte an unser Team aus Muttersprachlerinnen und Muttersprachlern sowie Testexpertinnen und Testexperten, das Sie über den Online-Helpdesk bzw. die telefonische Korrekturhotline erreichen. Die Rückmeldungen der Fachteams haben ausschließlich beratende und unterstützende Funktion. Die Letztentscheidung bezüglich der Korrektheit einer Antwort liegt ausschließlich bei der beurteilenden Lehrkraft.

Online-Helpdesk

Ab dem Zeitpunkt der Veröffentlichung der Lösungen können Sie unter der Webadresse https://bestellung.srdp.at/helpdesk Anfragen an den Online-Helpdesk des BMBWF stellen. Beim Online-Helpdesk handelt es sich um ein Formular, mit dessen Hilfe Sie Antworten von Kandidatinnen und Kandidaten, die nicht im Lösungsschlüssel enthalten sind, an das BMBWF senden können.

Sie erhalten von uns zeitnah eine Empfehlung darüber, ob die Antworten als richtig oder falsch zu werten sind. Sie können den Helpdesk bis zum Eingabeschluss jederzeit und beliebig oft in Anspruch nehmen, wobei Sie nach jeder Anfrage eine Bestätigung per E-Mail erhalten. Jede Anfrage wird garantiert von uns beantwortet. Die Antwort-E-Mails werden zeitgleich an alle Lehrerinnen und Lehrer versendet.

Anleitungen zur Verwendung des Helpdesks für AHS und BHS finden Sie unter:

- https://bestellung.srdp.at/Anleitung_Helpdesk_AHS.pdf (AHS)
- https://bestellung.srdp.at/Anleitung_Helpdesk_BHS.pdf (BHS)

Die Zeiten des Online-Helpdesks entnehmen Sie bitte https://ablauf.srdp.at. Falls eine telefonische Korrekturhotline angeboten wird, sind die Zeiten ebenfalls dort ersichtlich.

1 Farming in the Midwest

Begründungen

0

The speaker says: "In the middle of the 19th century, big railroad companies in the U.S. faced a bit of a problem. <u>Congress had recently granted them millions of acres of public lands</u> in the newly acquired Western territories." Therefore, in their beginnings, rail companies in the American West got support from the U.S. government.

1

The speaker says: "They needed people. They needed towns. They needed goods to transport and farmers to grow those products. They realized that they were gonna have to import a brand-new population, and so in the 1870s, they turned to Europeans – ideal candidates for relocation. European farmers and peasants were struggling at that very time under various forms of persecution, famine, and crushing rents." Therefore, people from Europe seemed suitable as settlers because they were longing for a better life.

2

The speaker says: "This is Andy Piasecki. A student of public relations, he argues that the campaign to track European settlers to America <u>was one of the earliest examples of the kind of sophisticated corporate marketing efforts that we'd recognize today.</u>" Therefore, measures taken to make farmers come to the U.S. turned out to be surprisingly modern.

3

The speaker says: "Across the European continent, railroad men visited agricultural fairs to <u>distribute</u> <u>maps and pamphlets</u>." Therefore, representatives of the railway companies handed out promotion material.

4

The speaker says: "Hired men masquerading as professors touted the idea that <u>America was a farmer's paradise</u>. Some of these so-called professors said a farmer could grow crops nine months out of a year in America, or that Nebraska only had one month of winter." Therefore, people willing to emigrate were informed that the U.S. offered an ideal setting for agriculture.

5

The speaker says: "If hard work doesn't agree with you or you can't get on without luxuries, stay where you are." Therefore, a rail company advised people to remain in Europe if they disliked laboring.

6

The speaker says: "In the end, the PR campaigns were a stunning success." Therefore, the efforts to make Europeans come to America proved to be effective.

7

The speaker says: "As for what they found when they got here – that whole independence thing – well, for many, it didn't pan out." Therefore, on arrival, for a lot of immigrants the conditions turned out other than expected.

8

The speaker says: "A lot of the farmers had taken loans from railroad companies to <u>acquire their land</u>, and those same companies were controlling the costs of moving produce to markets." Therefore, many settlers had borrowed money to buy their property.

The speaker says: "No matter how hard a farmer worked, he <u>couldn't seem to ever catch up with the debt that he was saddled with</u>." Therefore, although settlers tried constantly, they were unable to repay their loans

Begründungen

0

The speaker says: "Previous efforts have foundered because of <u>a lack of interest amongst sponsors</u> and the public." Therefore, trying to organise a Tour de France for females has failed due to sponsors' lack of interest.

1

The speaker says: "Professional women's sport is much less popular than the male equivalent. Why? If there were <u>more sponsorship and media coverage</u>, some say, then women's sports would be more popular." Therefore, one reason why female sports are less recognized could be that they get less media coverage or less sponsorship.

2

The speaker says: "The Women's Sport and Fitness Foundation or WSFF reports that in 2013, women's sport received <u>7% of coverage</u> and 0.2% of the total value of commercial sponsorships." Therefore, in 2013, the amount of media presence of female sport was only 7%.

3

The speaker says: "Viewers want to watch sports at the highest professional standard and sponsors want to be associated with <u>the best athletes</u>." Therefore, those who put money into sport are interested in being related to the best athletes.

4

The speaker says: "The English women's cricket team became professional earlier this month, signing a two-year sponsorship deal with <u>KIA</u>, a car maker." Therefore, one British female team now receives money from KIA, a car maker.

5

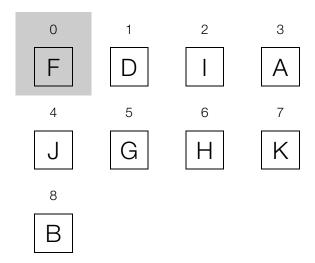

The speaker says: "Wimbledon, the oldest tennis tournament, started awarding women the same amount of prize money as men in <u>2007</u>." Therefore, the sum that top tennis players can win has been equal for men and women since 2007.

The speaker says: "More strikingly, the opinion of sports fans seems to be shifting. 61% of fans surveyed by the WSFF said they believe that top sports women were just as skilful as their male equivalents, and over half said women's sport was just as <u>exciting</u> to watch." Therefore, in a poll, over 50 percent of people said that watching female sports is exciting.

7

The speaker says: "In Britain, 750,000 athletes took up team sports. After the Olympics, <u>500,000</u> of them were women." Therefore, the number of females who started doing sports after the Olympics was 500,000.

3 Institute of Science and Technology Austria

Begründungen

n

The interviewer says: "At the moment there are just 160 scientists working on the campus of the former <u>psychiatric hospital</u>." Therefore, in the past, the building was a place to treat people suffering from mental illnesses.

1

The interviewer says: "She has previously researched in such prestigious institutions as Stanford and the New York University Medical Center [...]." Therefore, before Siekhaus took up her new position, she used to work at places with an excellent reputation.

2

Daria Siekhaus says: "The faculty and the colleagues that you have here, the students, the post-docs, are all tremendously creative, smart and interactive." Therefore, Siekhaus appreciates the characteristics of the people who work and study at the Institute.

3

Daria Siekhaus says: "I use the fruit fly to try to understand how cells can move through barriers. And why this is important is because cells do this during cancer spreading and when immune cells chase down infections." Therefore, Siekhaus works with a type of insect to do a special kind of medical research.

4

Daria Siekhaus says: "I understand that I'm being funded by the taxpayers and they would like to see something useful as a result." Therefore, Siekhaus knows that public funding is expected to result in helpful research findings.

Daria Siekhaus says: "The thing that tax payers may not know or understand completely is that basic research, it's not a linear process. [...] We keep knocking on doors and hoping that we will open one and that we'll be in a room that's really exciting, but you have to knock on a lot of doors to find that room." Therefore, while doing research, scientists have to explore various research paths.

6

The interviewer asks: "Do you think that part of the problem is that the media underreports scientific achievement so much, and a lot of great breakthroughs are happening in science pretty much under the radar for the public." Daria Siekhaus answers: "[...] science isn't covered as much as I think, as a scientist, it should be because there is so much excitement [...]." Therefore, Siekhaus agrees with the interviewer that successful research should get more public recognition.

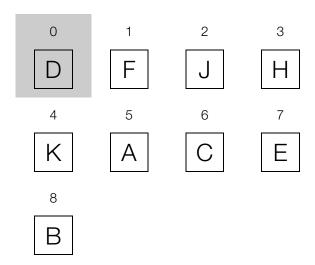

7

Daria Siekhaus says: "I think science journalism doesn't always report on how the scientific process works, on the amount of failure that is required to achieve success, on the amount of frustration that is required to achieve happiness." Therefore, the media should present lack of success as a necessary part of scientific work.

8

The interviewer asks: "How important is it that scientific research budgets are kept intact?" Daria Siekhaus answers: "You are talking to a scientist, so I am a bit biased, but anyway, if I contrast America with Austria right now, America is having severe problems of austerity and hence they're cutting their NH budget. And I have to say a lot of European scientists and me, an American scientist, are going to Europe as a result." Therefore, Siekhaus left the USA as a result of financial restrictions on research.

4 Bilingual education in the USA

Begründungen

0

The speaker says: "She's actually executive director of a group called *Californians Together*, and that group is responsible for convincing the State of California to <u>start awarding students the bilingual seal</u>." According to the interviewer, Spiegel-Coleman's organization therefore created a certificate to acknowledge youngsters with more than one language.

The speaker says: "And the story starts in 1998 when <u>Californians voted in favor of a measure that directed schools to ban bilingual education</u>; to teach kids English, by teaching them in English."

Therefore, in the 1990s, a US state decided to stop teaching in two languages.

The speaker says: "What we as *Californians Together* have been about since the passage of that initiative to really was to <u>try and change people's perspective as well as their feelings about bilingualism</u> [...]." Spiegel-Coleman's organization therefore intends to encourage a rethinking of attitudes.

3

The speaker says: "[...] to honor students who have proficiency in two languages instead of looking at them as students with deficits. We think that we could really promote this issue of bilingualism, but not only promote it but to see it as a value to our communities and to our state and to our nation." The ability to speak two languages should therefore be seen as a benefit.

4

The speaker says: "Well, there are officially nine states including California who have a formal policy for a state seal. And there are ten other states plus the DC public schools that are in the process of developing them." Therefore, an increasing number of US states have decided to follow the example of California.

5

The speaker says: "[...] both students that she spoke with were very enthusiastic about learning a second language for different reasons. But in fact we're seeing foreign language instruction drop in the US [...]." The second speaker says: "[...] I think you're right. The data does show that fewer students are taking world languages, and the study in other languages has dropped." Therefore, overall, youngsters in the US appear to show little interest in languages.

6

The speaker says: "I mean, you've heard from the Department of Defense over and over again that they are lacking professionals who can deal and communicate and negotiate in countries across this nation in the language of that country." Therefore, the government does not have enough staff who seem to be good at foreign languages.

7

The speaker says: "Industries across California have said that they need bilingual applicants and that those are a priority for their hiring practices. And when asked why, they said [...] being able to reach out to new markets." Therefore, staff with more than one language are in demand to help companies form business connections.

8

The speaker says: "[...] there's been a tremendous amount of brain research as to how your brain functions, that you have much better brain function when you're able to function in two languages: you're able to multi-task; you're able to see things from different perspectives [...]." Therefore, scientific studies show that bilingual speakers can do several things simultaneously.
