Korrekturheft

Hinweise zur Korrektur

Bei der Korrektur werden **ausschließlich die Antworten auf dem Antwortblatt** berücksichtigt.

Korrektur der Aufgaben

Bitte kreuzen Sie bei jeder Frage im Bereich mit dem Hinweis „*von der Lehrperson auszufüllen*“ an, ob die Kandidatin/der Kandidat die Frage richtig oder falsch beantwortet hat.

Falls Sie versehentlich das falsche Kästchen markieren, malen Sie es bitte vollständig aus (■) und kreuzen das richtige an (☒).

richtig	falsch
<input type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Gibt eine Kandidatin/ein Kandidat bei einer Frage zwei Antworten an und ist eine davon falsch, so ist die gesamte Antwort als falsch zu werten. Bei der Testmethode *Kurzantworten* zählen alle Wörter, die nicht durchgestrichen sind, zur Antwort.

Bei der Beurteilung werden nur ganze Punkte vergeben. Die Vergabe von halben Punkten ist unzulässig.

Akzeptierte Antworten bei der Testmethode Kurzantworten

Das Ziel der Aufgaben ist es, das Hör- bzw. Leseverständnis der Kandidatinnen und Kandidaten zu überprüfen. Grammatik- und Rechtschreibfehler werden bei der Korrektur nicht berücksichtigt, sofern sie die Kommunikation nicht verhindern. Es sind nur Antworten mit maximal 4 Wörtern zu akzeptieren.

Standardisierte Korrektur

Um die Verlässlichkeit der Testergebnisse österreichweit garantieren zu können, ist eine Standardisierung der Korrektur unerlässlich.

Die Antworten Ihrer Kandidatinnen und Kandidaten sind vielleicht auch dann richtig, wenn sie nicht im Lösungsschlüssel aufscheinen. Falls Ihre Kandidatinnen und Kandidaten Antworten geben, die nicht eindeutig als richtig oder falsch einzuordnen sind, wenden Sie sich bitte an unser Team aus Muttersprachlerinnen und Muttersprachlern sowie Testexpertinnen und Testexperten, das Sie über den Online-Helpdesk bzw. die telefonische Korrekturhotline erreichen. Die Rückmeldungen der Fachteams haben ausschließlich beratende und unterstützende Funktion. Die Letztentscheidung bezüglich der Korrektheit einer Antwort liegt ausschließlich bei der beurteilenden Lehrkraft.

Online-Helpdesk

Ab dem Zeitpunkt der Veröffentlichung der Lösungen können Sie unter der Webadresse <https://bestellung.srdp.at/helpdesk> Anfragen an den Online-Helpdesk des BMBWF stellen. Beim Online-Helpdesk handelt es sich um ein Formular, mit dessen Hilfe Sie Antworten von Kandidatinnen und Kandidaten, die nicht im Lösungsschlüssel enthalten sind, an das BMBWF senden können.

Sie erhalten von uns zeitnah eine Empfehlung darüber, ob die Antworten als richtig oder falsch zu werten sind. Sie können den Helpdesk bis zum Eingabeschluss jederzeit und beliebig oft in Anspruch nehmen, wobei Sie nach jeder Anfrage eine Bestätigung per E-Mail erhalten. Jede Anfrage wird garantiert von uns beantwortet. Die Antwort-E-Mails werden zeitgleich an alle Lehrerinnen und Lehrer versendet.

Anleitungen zur Verwendung des Helpdesks für AHS und BHS finden Sie unter:

- https://bestellung.srdp.at/Anleitung_Helpdesk_AHS.pdf (AHS)
- https://bestellung.srdp.at/Anleitung_Helpdesk_BHS.pdf (BHS)

Die Zeiten des Online-Helpdesks entnehmen Sie bitte <https://ablauf.srdp.at>. Falls eine telefonische Korrekturhotline angeboten wird, sind die Zeiten ebenfalls dort ersichtlich.

1 Honey bees at risk

0	1	2	3	4	5	6	7
C	A	D	A	D	C	B	B

Begründungen

0

The speaker says: "Honeybees are disappearing globally at an alarming rate. It's due to pesticides, parasites, disease and habitat loss." Therefore, one of the reasons why the number of bees is decreasing is that their natural environment is shrinking.

1

The speaker says: "However, many farmers say that the insecticides are vital to prevent crops from being destroyed by pests." According to people working in agriculture, chemicals are therefore essential to avoid harvest loss.

2

The speaker says: "And he [Walter Haefeker] says more needs to be done to ban dangerous pesticides." Walter Haefeker says: "Beekeepers were the first to find out that there was something wrong with the approval of these pesticides. After a long process we have a partial ban. This ban should be expanded." Walter Haefeker therefore explains that rules about chemicals have to become stricter.

3

Walter Haefeker says: "The scientists at the EFSA, European Food Safety Authority, have gone through the process of reevaluating these testing methods, they've made a proposal how to improve them, and now it's up to the politicians to actually enact this." Therefore, the decision how to assess chemicals is the responsibility of government officials.

4

Walter Haefeker says: "There is a fair number of crops that simply depend on pollination by honey bees or their wild relatives and those are crops that make our food healthy and diverse." Therefore, bees are so important because they help various plants grow.

5

Walter Haefeker says: "Honey bees are a success story over millions of years through all kinds of climate change and whatnot. They've been a very resilient species." Over the course of time, honey bees have therefore survived different environmental conditions.

6

Walter Haefeker says: "There are new beekeepers joining the beekeeping community that don't want to keep many hives, that have the idea that maybe I don't even need the honey, I just want to provide space for bees, so that they are out there in the garden, pollinating." Currently a group of inexperienced beekeepers therefore aims to maintain only a few bee colonies.

7

Walter Haefeker says: "There are new beekeepers joining the beekeeping community that don't want to keep many hives and have the idea that maybe I don't even need the honey, I just want to provide space for bees so that they are out there in the garden, pollinating. And this is a way of beekeeping that is simply not possible because you need to be trained enough to really take care of the bees. So if you are somebody that wants to do something positive for the bees, there is another possibility where you create habitat, you create nesting places and you'll be surprised how many bees will actually just show up and be out there pollinating your garden." If beginners want to keep bees successfully, they should therefore have sufficient knowledge on the subject.

Begründungen

0

The speaker says: "It's a place where people have been living with very little water for a very long time and still face increasing water bills." Therefore, the people who live in the dry region have to deal with increasing water bills.

1

The speaker says: "As NPR's Richard Gonzales reports, some low-income residents there worry that if they can't pay their water bills, the county could shut off their taps." Therefore, low-income residents in particular are afraid of losing their water supply.

2

Leticia Fernandez says: "I mean we used to have produce and milk, deliveries were here every week, now twice a month."

The speaker says: "Fernandez blames the drought. Customers disappeared as local ranchers didn't bother to plant row crops for lack of water – no farm workers, no customers, says Fernandez." Therefore, the shop has lost customers because of the water shortage.

3

The speaker says: "Their water supply is passed through the local water district to Fresno County. Recently, that district tripled the price of water. County officials tried to raise water fees in Cantua Creek by about \$30 per month to cover the increase, but the community said no." Therefore, tap water costs three times as much now.

4

The speaker says: "Officials say the county is in no position to pay for Cantua Creek's water, the residents have to pay for themselves. Fresno County Supervisor Henry Perea says the county has no legal obligation to help the residents of Cantua Creek [...]." Therefore, local politicians refuse to help the people of Cantua Creek financially because there is no legal obligation.

5

The speaker says: "Last week, word spread that the State of California would step in with short-term drought emergency funds - about \$120,000 - to help Cantua Creek pay its water bill." Therefore, the State of California would help financially if absolutely necessary.

6

The speaker says: "Last week, word spread that the State of California would step in with short-term drought emergency funds - about \$120,000 - to help Cantua Creek pay its water bill." Therefore, \$120,000 could be provided.

7

The speaker says: "Back in Cantua Creek Leticia Fernandez says she and her neighbors are already conserving. They've installed low-flow shower heads, limited flushing, no water for gardens or washing cars." Therefore, the residents save water inside their houses with low-flow shower heads and limited flushing.

3 Stress on the rise

0	1	2	3
D	M	K	G
4	5	6	7
F	L	B	A
8	9	10	
H	I	J	

Begründungen

0

The speaker says: "I seem to be reading that people are more stressed than ever before. I hear it all the time, but is that really true or is that just something we like to say?"

The speaker says: "No, I think it really is true." Therefore, something that many claim to be the case is actually a fact.

1

The speaker says: "Musculoskeletal diseases was the main cause of sickness absence in the UK for decades. Now it is the common mental disorders of depression, anxiety, and stress. They are now the leading causes of sickness absence, not just in the UK workforce by the way, but throughout the developed world." Therefore, mental health problems are the main reason why people stay at home.

2

The speaker says: "[...] people have only been studying stress since the 50's. So it's still a relatively new field scientifically, and there haven't been many studies looking at the change in population health." Therefore, research on why people feel under constant pressure is a fairly recent development.

3

The speaker says: "When asking, 'Are we getting more stressed?', universities have reported a 10% increase in uptake of their counselling services year on year, with mental health problems on campus raising from 8,000 to 18,000 cases in just four years." Therefore, a significant number of students seek professional support.

4

The speaker says: "And then in terms of really big numbers, in 2014 the charity, Mind (the mental health charity), found that 56% of the workers they polled reported workplace stress, which is really a crazy amount." Therefore, more than half of the participants in one survey feel their jobs cause them to suffer.

5

The speaker says: "But I wonder, is there a difference between stress and just, you know, having a lot on your plate?" Therefore, the question is whether feeling under strain and simply being very busy are the same thing.

6

The speaker says: "By the way, pressure is stimulating and motivating, but when pressure exceeds your ability to cope, then you're in the stress arena and when that happens, you'll get ill health consequences." Therefore, challenges that are too demanding have a negative impact.

7

The speaker says: "If you think about it, 30 or 40 years ago, people worked within a radius of 30 miles of where they lived. They had the community around them, they had their extended family; we don't have the extended family anymore. We don't have the natural counsellors in our environment: the aunts, the grandmas, the neighbours who knew four generations of your family, who were people you could go talk to because we weren't mobile." Therefore, we now live farther away from people who could offer advice.

8

The speaker says: "Jobs are no longer for life and we're working longer hours. If you take the UK, we have the longest working hours in the developed world behind the United States." The amount of time we spend doing our job has therefore changed.

9

The speaker says: "What's also happening, I think, is not only the speed of technology and the constant change that we're undergoing as a major kind of outside source of stress on people, but think about information and communication technologies. Just think about email. Email is overloading people." New developments therefore make it difficult to keep up.

10

The speaker says: "[...] in fact, it's interesting that many employers now are closing down their servers at the weekend because people are accessing it too often, some at night." A lot of companies therefore make it impossible for their staff to work all the time.

4 Rebuilding Chinatown

0	1	2	3	4	5	6	7
B	D	A	C	B	A	D	C

Begründungen

0

The speaker says: "In 1904, two years before the fire, then mayor James Phelan had asked architect Daniel Burnham to draft some sketches of a new downtown. And in those sketches, there simply is no Chinatown." Therefore, plans for a city center without Chinatown were developed before the city burnt down.

1

The speaker says: "In the days after the fire, the current mayor, Eugene Schmitz, worked fast to make that perfect city a reality. He appointed James Phelan and other powerful leaders to a committee entirely dedicated to relocating Chinatown." Therefore, the mayor's commission was set up mainly for the purpose of rebuilding the district elsewhere.

2

The speaker says: "According to US laws, if the land belongs to the building owner, the landlord has the right to build on his land. Local officials have no right to stop him." Therefore, the measures of the former residents in Chinatown were in line with American legislation.

3

The speaker says: "But the most significant move was economic. For decades, San Francisco had been a key hub for lucrative trade with China." Therefore, Chinatown's community was helped most by commercial interests.

4

Speaker 1 says: "So a group of the city's top Chinese merchants wrote to Mayor Schmitz in a language city officials easily understood."

Speaker 2 adds: "And so the negotiation was: 'Ok, you don't want us to come back? We can go to Tacoma, we can go to Portland.' So there's a panic of a loss of revenue for the city." Therefore, when Chinese businessmen said they would leave the city, the council was afraid of losing income.

5

The speaker says: "But the Chinese community took their victory one step further. San Francisco was a blank slate after the fire. So instead of letting the city draw up new architecture, an American-born Chinese merchant named Look Tin Eli had a plan." Therefore, after its residents had won, Chinatown's new concept came from one of their businessmen.

6

The speaker says: "He was able to pull together the resources and a committee of like-minded Chinese merchants to hire white architects to create a Chinatown that looked the way white people imagined Chinatown to look." Therefore, Chinatown's new appearance was like the majority of Americans expected it to be.

7

The speaker says: "It used Western stereotypes to rake in tourist dollars, and to give the district a new reputation for cleanliness and safety." Therefore, one purpose of the new district architecture was to attract lots of visitors.
